Your clients need affordable dental coverage

and I can help them enroll in a plan.

With the rising costs of everyday living expenses, insurance is often the first reoccurring expense families eliminate from their budget.

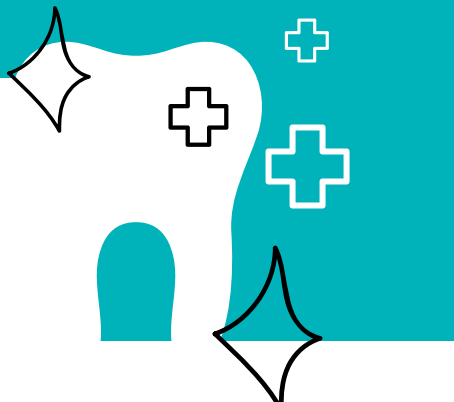

This means many of your patients will **let their dental insurance policies lapse** and self-pay for common services and procedures in your office.

As a licensed insurance agent, I can help your clients find and enroll into dental coverage that meets their needs and budget.

If you are interested in discussing how my referral program works, reach out to me and we can arrange a time to meet about how this program can help you & your clients.

I can help ensure your patients have access to dental care, and you get paid for the services you provide.
