Benefits of Medicare

When you enroll in Original Medicare, you then have coverage for things like hospice care, skilled nursing facilities, and durable medical equipment (all of which are not typically covered by VA benefits).

If you choose to enroll in a Medicare Advantage Plan (Part C), you will have the option to visit non-VA facilities without prior authorization, which in many cases means you may get faster access to specialized care. You will also would have the ability to choose your provider more freely than you would with only VA benefits.

One benefit you, as a veteran, would receive from looking into Medicare is being informed about your health care coverage options.

If you have both your VA benefits and a Medicare Advantage Plan, you have more flexibility with how you can receive treatment.

Many people use Medicare Advantage Plans if they live far away from a VA hospital or want to have access to non-VA providers.

Enrolling in Medicare

VA benefits and Medicare are two separate systems and you can use both at the same time to get what you need. However, because they are separate, they do not coordinate with each other.

Talk with a licensed insurance agent and find out what your needs are and make sure you find a plan that works for you.

Medicare Advantage (Part C) has the same coverage as Original Medicare & may include additional benefits.

Some Medicare Advantage plans include benefits that you would not receive through VA coverage.
