

# Your Clients May Benefit by Enrolling in a Medicare Plan!

and I can help them enroll!

When your clients enroll in Medicare they gain access to more coverage for things like, hospice care, skilled nursing facilities, and durable medical equipment. (things that are not typically covered by VA benefits.)

By having Medicare coverage in addition to their VA benefits, your clients will have more freedom when getting the care they need. In many cases people who have both VA benefits and a Medicare Plan will get faster access to specialized care when they need it.

Medicare isn't a replacement for VA benefits but something that can be used at the same time. They are two separate systems so they are not coordinated with each other, but having a Medicare plan can expand a person's benefits.

Because there are different Medicare plans and plan types, it's important for potential beneficiaries to talk with a licensed insurance agent and have a needs analysis done. This helps to make sure they are enrolled in a plan that suits their individual needs and lifestyle.

## How I Can Help

I am a licensed insurance agent who can educate your clients on their options, such as Medicare Advantage, Medicare Supplement, and Part D Prescription Drug Plans, and help them choose and enroll in Medicare coverage that will meet their needs & budget.

I can bring more value to your clients and help fill in gaps in their coverage. With more flexibility with where and how they receive treatment, you can focus more on the services you provide that are covered by VA benefits.

Enrollment in the described plan type may be limited to certain times of the year unless you qualify for a special enrollment period. Plan availability varies by region and state.

This is a solicitation to sell insurance, and is coming from a licensed health insurance agency, and not affiliated or endorsed by the government or federal Medicare program. Calling the number above will direct you to a licensed sales agent.
